Abstract

As a result of extensive survey carried out in Malakand Agency, Pakistan, a large number of new and known stylet bearing nematode species belonging to different genera were found. *Boleodorus neosimilis*, *Filenchus afghanicus*, *F. ditissimus*, *F. sheri*, *Paratylenchus italiensis* and *P.tateae* are reported for the first time from Pakistan. Morphometric data, description and illustrations of these species is given.
